

ANNOUNCEMENT

Materials/Supply Chain Organizations

We are pleased to announce the promotion of Linda Haggard to Branded Product Materials Manager for Power Transmission Solutions. Branded products are commonly referred to as “Buy-Out” Finished goods. This segment of our business continues to grow and has reached enough mass to warrant materials management oversight. In this new role, Linda will have direct responsibility for our Manila Buyer-Planner team; she will also assume responsibility for the Florence ATO production scheduler. Linda’s role as Manager of Off-Shore Resources and past P&I Management experience will assist her as she takes on this new role. Linda will report directly to Tony Prioreshi, Director of Materials, and will remain located at the Maysville, KY facility.

Mindy Boling is promoted to Linda’s former role as Manager Off-Shore Resources. In this role, Mindy will facilitate the distribution of work and supply chain projects into Manila. She will manage all aspects of project management including the development and deployment of training materials and will work with our Manila staff to insure smooth transitions. Mindy will also continue her support as our Oracle Training Facilitator as we complete the North America Oracle implementations. Mindy has experience in many aspects of project management, training deployment and supported the transition of Customer Service into Manila. Mindy will report directly to Diane Yavor, Vice President Supply Chain Systems, and will remain located at the Florence, KY facility.

This reorganization will allow us to optimize each individual’s expertise in delivering improved customer service along with helping us achieve our strategic initiatives.

Please join us in wishing Linda and Mindy success as they transition into their new assignments.

Diane Yavor
Vice President Supply Chain Systems

Anthony J. Prioreshi
Director of Materials
